Subject: **Notice of Water Shutdown** – Replacement of Two Broken Water Valves

Dear Water Customer:

Please be advised that on the morning of **July 08, 2015**, Crescenta Valley Water District crews will be performing a necessary water main shutdown to replace two broken water valves in front of 5481 Ocean View Blvd. and 5428 Vista Del Arroyo Dr. The construction will affect the water service in your neighborhood (see project location map on the reverse side).

This work will result in a temporary interruption of water service at your address on **Wednesday, July 08, 2015** between the hours of 8:00 a.m. and 5:00 p.m. Please plan for this temporary loss of water and accept our apology if this causes you any inconvenience.

We suggest that you draw water in advance of the shut off time to supply ordinary needs. It is also advisable to store water in the bathtub for toilet flushing. In addition, after the water is back in service, we recommend that you turn on your water faucet slowly as there maybe air trapped in your water line from recharging the water main in the street. The air should dissipate quickly when water service is restored back to normal. Lastly, it is suggested that for all appliances connected to your home's plumbing system that you consult the User's Manual to ensure proper use after the water is back in service.

This work is all part of the District's continuing effort to improve your water system. We ask for your cooperation and thank you for helping us to make this project a success.

**If you have any questions or comments concerning this project, please contact Peter Hilke at (818) 248-3925 or by E-mail at [philke@cvwd.com](mailto:philke@cvwd.com).**

Very truly yours,

CRESCENTA VALLEY WATER DISTRICT
