

CONSTRUCTION NOTICE

September 5, 2014

**SUBJECT: Southern California Edison (SCE) Construction Activities in Your Area:
Replacing Existing Transmission Lines**

Dear Neighbor:

Southern California Edison (SCE) is currently preparing to perform construction activities on two transmission lines north of your neighborhood. We would like to thank you in advance for your patience. Below you will find details about our work.

What to Expect

- Construction crews will be removing two existing single circuit 220 kilovolt (kV) transmission lines and installing one new double circuit 220 kV transmission line. *Please see map on reverse side.*
- Tower replacements will occur at sites north of Big Briar Way and Baytree Road.
- New transmission wires (conductor) will be installed in the existing SCE right-of-way located north of Haskell Street east to Angeles Crest Highway.
- Residents may notice construction crews, vehicles, and equipment entering and exiting the work locations. Access points are located near the top of Harter Lane and the Los Angeles County Flood Control access road located off El Vago Street. Construction vehicles and equipment may include work trucks, bucket trucks, stringing equipment, and a crane.
- The two new steel poles will be between 145-150 feet. The four existing towers that are being replaced with the steel poles are between 70-80 feet.
- Access to local trails may be restricted for short periods of time when construction crews are present (between 10-15 minutes at a time). Construction personnel will notify recreational users when it is safe to proceed through construction areas.

When Construction Will Occur

- Construction is scheduled to start on September 15 and end on or before November 7. Construction will occur between 7:00 a.m.-7:00 p.m. Monday-Friday. SCE may need to work additional hours in the event of unforeseen circumstances.

Questions?

Thank you for your patience while we perform this important work. If you have any additional questions, please feel free to reach out to me.
